MICROBIOLOGY & SEROLOGY

H. PYLORI ANTIGEN IN STOOL

Parameter	Result	Unit	Flag	Bio.Ref.Interval	Method
H. PYLORI ANTIGEN IN STOOL	Negative				ICT

Interpretive Guid:

H. pylori antigen testing is FDA approved for use as a noninvasive diagnostic test of H pylori infection and as a test to determine eradication after treatment. In the pretreatment setting, positive results indicate infection with H pylori, and negative results indicate lack of infection. In the posttreatment setting, negative results indicate eradication if testing is performed at least 4 weeks after therapy is stopped. Positive results indicate treatment failure.
